

Quick Facts:

With* Kamina

- The Ministry With the Poor program in Kamina is beginning its program by focusing on training 30 community-health workers in water and sanitation, community health, and sustainable agriculture.
- Community-health workers are in the position to share their information with communities throughout the area surrounding the town of Kamina, increasing the impact of the project.
- All 30 community-health workers have attended sustainable-agriculture and development training, which included introducing soy and Moringa crops to increase local nutrition.
- In 2010, UMCOR distributed more than 15,000 insecticide-treated mosquito nets in Kamina to children under age 5 and pregnant women to help reduce malaria transmission.
- UMCOR has begun to establish household bio-sand water filters to help provide clean water to families in need.
- In 2010, UMCOR constructed two community wells in Kamina, providing 5,000 people with improved access to clean water.
- UMCOR constructed three latrines at a primary school with approximately 2,000 students.
